Taunggyi - Myanmar

SKILLS

- Python (FastAPI)
- Java (Jakarta EE)
- REACT (Next.js)
- AI / ML
- HMM & N-Gram Modeling
- MySQL
- Git & GitHub

LANGUAGES

- MYANMAR
- ENGLISH
- CHINESE

HOBBIES

- READING
- TRAVELING
- SPORTS
- LEARNING NEW TECHNOLOGIES

SUMMARY

Final-year Computer Science student specializing in full-stack web and mobile development, as well as AI/ML engineering. Experienced in building scalable applications using React, Next.js, React Native, FastAPI, Supabase, and PostgreSQL, along with deploying NLP models and time-series forecasting systems. Proven track record of developing end-to-end data-driven solutions, including scam detection platforms and predictive

EXPERIENCE

AI/ML Software Engineer

EmoChat (Full-Stack Web App)

- Architecture & Tech: Next.js, FastAPI, Supabase, PostgreSQL, TypeScript
- Engineered a full-stack real-time web application featuring secure user authentication, real-time data handling, and RESTful APIs connecting a Next.js frontend with a FastAPI backend.

Gold Price Prediction / GoldSense AI (AI/ML Web App)

- Architecture & Tech: Python, FastAPI, Time-Series Forecasting, React/Next.js
- Developed an end-to-end predictive analytics web application utilizing time-series machine learning models to forecast market trends, exposing model endpoints via FastAPI to serve interactive frontend dashboards.

Smart Q (KBZPay Mini App)

- Architected and developed **Smart Q**, a digital queueing mini app hosted on the KBZPay platform.
- Integrated secure API workflows to sync real-time queue status with user notifications and mobile wallet interactions.
- Reduced average waiting room friction by digitizing ticketing processes, enhancing user engagement within the KBZPay super-app context.

Learning Management System (LMS)

- Architecture & Tech: Java, OOP, Database Management
- Designed an object-oriented desktop application to manage user roles, course enrollments, and academic materials with structured relational data storage.
